Scan and Share Your Slides

Anytime, Anywhere

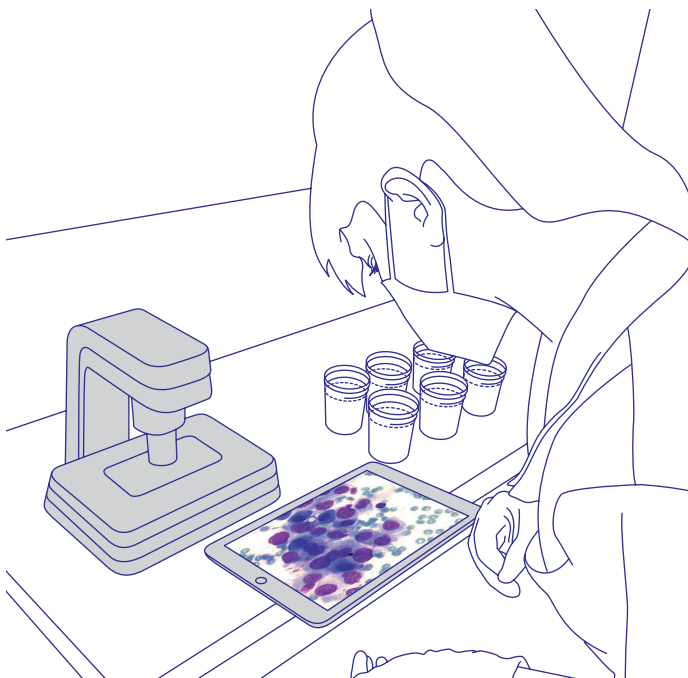

Grundium OCUS40 Single Slide Scanner with X Line Objectives

Now you can create quality digital slides where and when you need them.

The OCUS40 combines the convenience of a compact scanning platform with our top performing X-line objectives, delivering flawless digital slides.

Thanks to quick and easy-to-use remote-controlled operation via iPad or PC, you can now create and share your digital scans to facilitate a wide range of applications.

Scan and Share Your Slides, Anytime, Anywhere

Faster ROSE* Analyses

Whenever ROSE is applied, time becomes critical—to ensure samples are adequate for diagnostic procedures. The OCUS40 scanner quickly scans the sample in the same room, enabling an expert's evaluation to be immediately executed from any location, inside or out of the hospital. Its small size and wireless connectivity make it easy to fit into workplaces and to move to wherever it is needed.

Enabling TELE-PATHOLOGY

Sharing samples and opinions in pathology is important, often made impractical by having to transport slides. The OCUS40 scanner overcomes this by producing digital slides wherever and whenever needed. Live images can be accessed and navigated remotely via an intuitive interface. A consensus mode also allows 8 people to navigate together, ensuring efficient discussions.

Features and Technical Data

- Operated via web-interface from any desktop, laptop or tablet: no need to install software
- Full remote control of the scanned image and the live image
- Scans 75x25mm slides with brightfield illumination and autofocus
- 15x15mm area is scanned in ~3 min. with 0.25 μm /pixel resolution
- Network connectivity (1 GigE / 802.11ac WLAN) available for scanner control and image sharing
- Portable—fits into carry-on luggage and is vibration resistant
