## Scanning Speed

*The EzScan is a more than decent intraoral scanner. Compared to most of the other scanners on the market, it has above average scanning speed. **You can achieve full-arch scans using the EzScan within 60 seconds.***

*Anyone familiar with IOS scanning strategies will be able to use the EzScan with ease. EzScan provides an above-average scanning experience and is used without scanning powder.*

**vatech**

# EzScan

## Scanner Size & Ergonomics

*Ergonomics is the strongest part of the EzScan. It is the second **lightest scanner on the market, weighing in at 150 grams.***

*This scanner is very ergonomic and fits nicely in hand thanks to the curved scanner body design.*

*The light weight of the scanner is something that you notice straight away and is an aspect that is surprising in a good way.*

WOW scanner	110 g	TRIOS	~345 g
<b>EzScan</b>	<b>150 g</b>	CEREC Primescan	~457 g

## *Inbuilt Fan*

*The EzScan has an inbuilt fan in the scanner.*

*Like almost every scanner on the market, this makes it easy to scan for long periods in the mouth as the fan prevents fogging of the scanner tip.*

**vatech**

# EzScan

## Full Arch Scanning

The EzScan handles full arch scans well. **It's easy to carry out full arch scans within a minute.** Its success in this aspect is a combination of the following factors - **fast and accurate scanning, picking up where you stop quickly, and an inbuilt fan** that prevents fogging and enables long periods of uninterrupted scanning.

The EzScan also performs well when scanning edentulous sites.

**vatech**

# EzScan

## Calibration-free

*The EzScan is calibrated and does not need any additional calibration. ✓*

*Being calibration-free is an interesting concept which is only otherwise seen in the Carestream Dental CS line of intraoral scanners. **Most, if not all, other scanners require frequent calibration.***

# EzScan

## *EzScan-i Software*

*Overall an aesthetic and highly polished software, it enables scanning and exporting of cases. The software is designed to be **very easy for doctors to use**.*

*The workflow is good. **The UI is easy to use and understandable**. For implant scanning, for example, the software advises you step by step on what to do. It has an excellent level of polish and generally works well.*

**vatech**

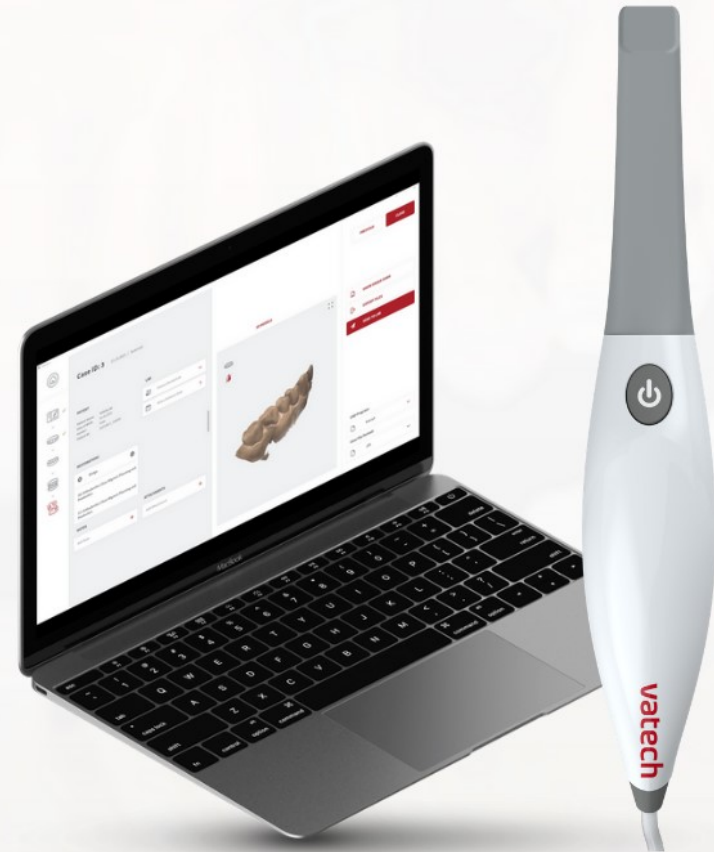

# EzScan

## *Ease of Use*

---

*The EzScan-i software does very well in making the workflow straightforward.*

*Ease of use comes from the software that supports the hardware. The workflow is intuitive and follows a simple step-by-step progression that is identical across every system on the market nowadays.*

**vatech**

## EzScan Solution Workflow

### **Case Creation**

*Create and manage the order in just a few steps. Create, scan and share.*

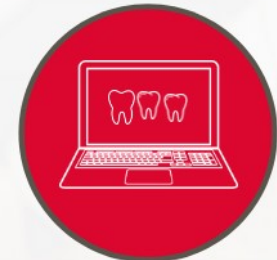

### **Scanning**

*A fast intuitive process performed by the dentist or the dental assistant.*

### **Case Sharing**

*A file sharing module for simple sharing of the digital impression with your lab of choice*

### **Lab & CAD Integration**

*An open system, compatible with most dental CAD system*

**vatech**

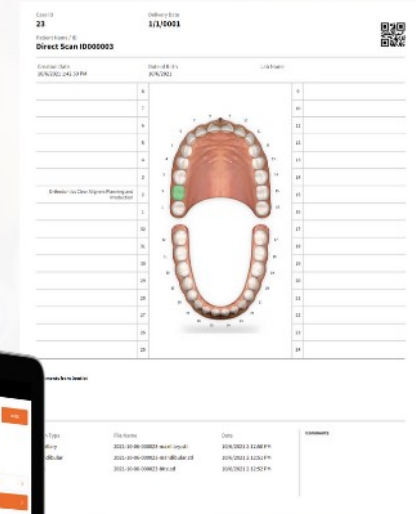

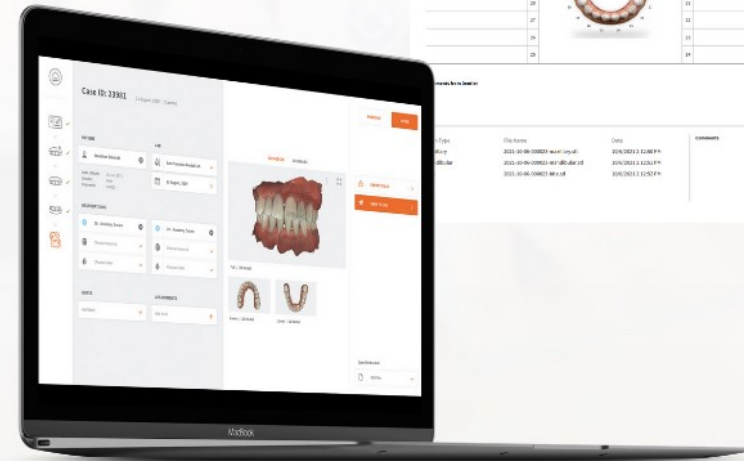

# EzScan

## Freely Open Architecture

*The EzScan system is entirely open.*

*The software enables easy export of scans in multiple different formats.*

*This includes the popular **STL** file type but also **OBJ**, **PLY**, or **DWOS** / exocad dental project files.*

vatech

# EzScan

## Cost

---

*The EzScan is one of the most affordable scanners on the market.*

*The EzScan autoclavable scanning heads have a limit of 250 cycles, after which they will need to be replaced. This is a ridiculously high number of cycles as most other scanners are between 50-100.*

*up to*  
**250 times**  
*autoclavable tips*

**vatech**

# EzScan

## ***NO Yearly Fees***

*The EzScan has **no yearly fees** or subscription costs.*

*EzScan uses cloud storage for data transmission, and the cloud is free.*

*All software updates are included for free with the scanner. **There are absolutely no ongoing fees except for scanner heads.***

**vatech**

# EzScan

## EzScan Summary

---

Overall, the EzScan is an above-average scanner. You can quickly achieve full arch scans within a minute of scanning time. **The main strength of the scanner lies in its ergonomics.**

**Good scan speed / full-arch scans within 60 seconds** ✓

**Ergonomic and Super Lightweight at 150 grams** ✓

**Autoclavable scanning heads with a limit of 250 cycles** ✓

**The tip can be rotated 360° degrees** ✓

**Open platform with No Continued Fees** ✓

**Easy exporting in STL, OBJ, PLY, or DWOS** ✓
